

# Polimetrics

## Fourth Assignment

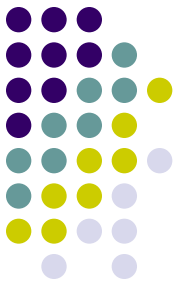

# Deadline: 6 November 2018

1. Analyze via wordfish the UK party manifestoes discussed in Lab class 2 and 3 by placing LAB 92 to the left of CONS 92
2. Save the wordfish estimates and include them together with the year of the manifestoes (i.e., 1992 and 1997) as covariates for assessing the topic prevalence in your Structural Topic Model (remember how we do that! Check the script for Lab 5!)
3. Run your structural topic model
4. Justify the number of topics considered and briefly discuss some of them

# Deadline: 6 November 2018

5. Run the topic prevalence graph on some topics and briefly discuss the results
6. Re-run the structural topic model by using the year of the manifestoes as the covariate for topical content
7. Run the topical content graph on some topics and briefly discuss the results
