SECOND ASSIGNMENT (CURINI)

Using the dataset on Happiness for assignment
(happiness for assignment.dta)

Develop a model to explain Satisfaction with Your Life. Use a fixed effect model and a random effect model, while also including a non-linear relationship into your model, and compare the results. Describe your results in no more than 500 words.

Due the 27th of March

NB: ASSIGNMENTS THAT EXCEED THE WORD LIMITS WILL NOT BE MARKED.
