Polimetrics
Sixth Assignment

Deadline: 20 November 2018

1. Retrieve the last 3,000 tweets from the official account of Donald Trump "@realDonaldTrump"

2. Run a dictionary analysis on such tweets as you like. Briefly comment your results

3. Run a STM on the set of tweets using as covariate for assessing the topic prevalence in your Structural Topic Model the day in which they have been posted that you treat as a "continuous" variable (remember! When you assess a "continuous" topic prevalence model, your covariate should be a number, not a character or a date! Use the option: *as.numeric(the name of your variable)*. Briefly comment your results
